

Thickener TFB

Thickener TFB is a high quality, high concentration thickener, for reactive printing specifically for the Textile Printing Industry.

Thickener TFB is suitable for Thickening Reactive Printing paste as well as for printing on cotton, viscose rayon and all synthetic textiles. It is a fine, aqueous acrylic copolymer dispersion in high purity mineral oil which disperses readily in water and rapidly produces smooth pastes.

Thickener TFB is designed for very convenient preparation of printing formulations which can be effectively thickened by direct addition to the mixture or Thickener TFB can be used as part of the customer's specific thickener stock preparation (with or without ingredients other than the reactive dye itself). Thickener TFB has high active content reducing handling and storage.

PRODUCT CHARACTERISTICS:

Appearance : White viscous liquid

Chemical Composition : Acrylic copolymer

Polymer Charge : Anionic

Bulk viscosity : <3500cps

Storage:

Can be stored for six months under cool and well ventilated conditions, Avoid exposure from direct sunlight.

STATEMENT

This Technical Manual is edited based on our current experience and knowledge only for free reference purpose. Information mentioned above cannot be taken as any guarantee because many factors may affect the product effect. Customers must test the products according to their own practical situation to ensure the product can meet their requirements.
